TIPS TO KEEP YOUR WATER FLOWING IN THE EXTREME COLD WEATHER

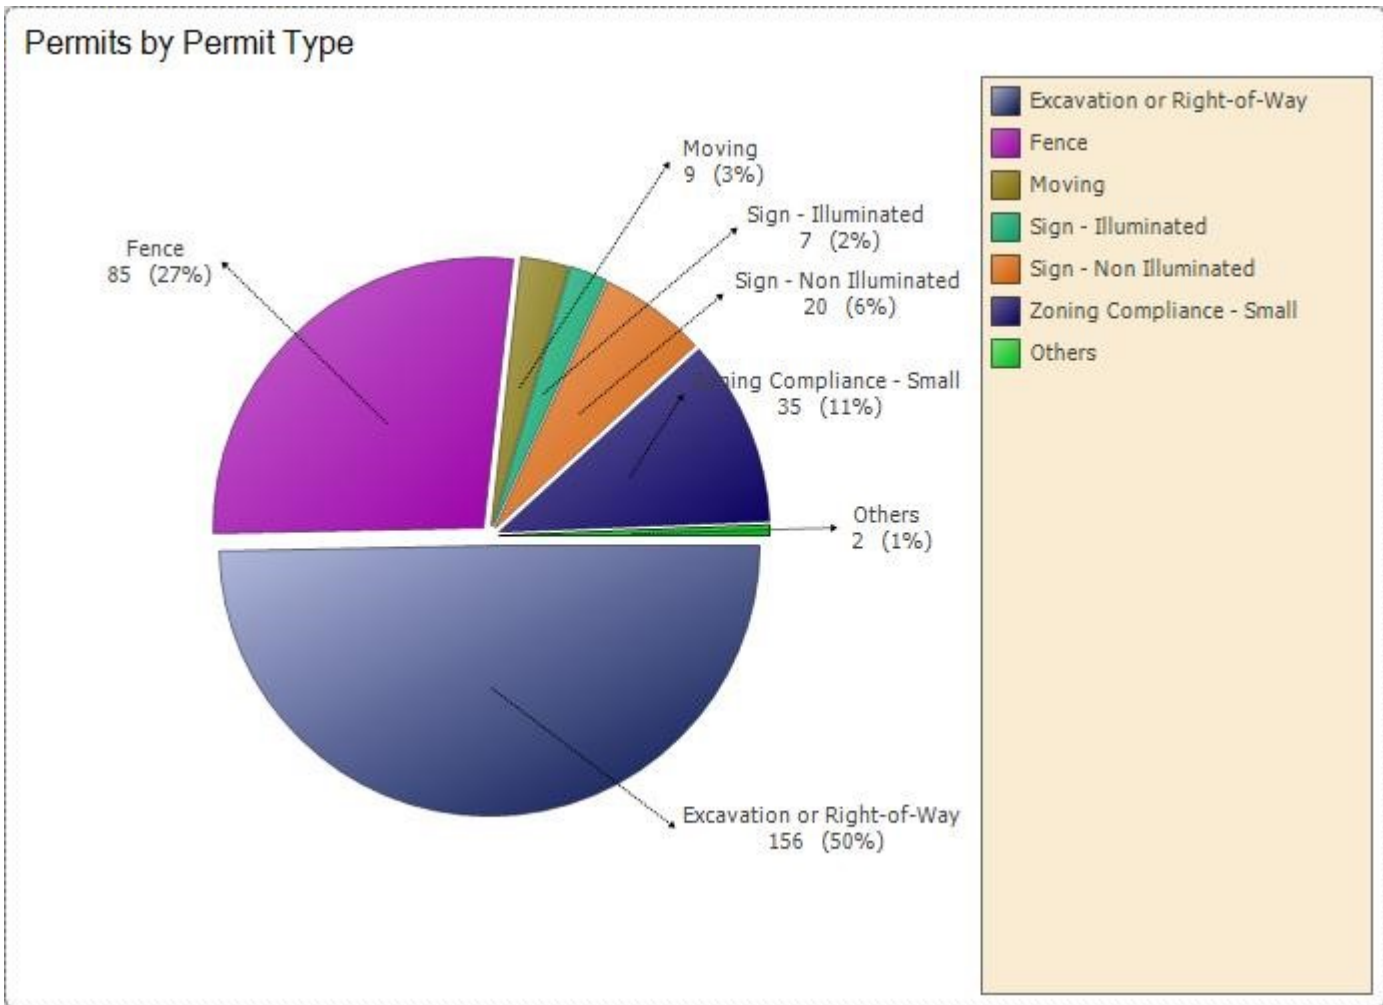

- * Check basements and crawl spaces for drafts.
- * Check plumbing close to a vent or window.
- * Turn on or install heat tape on plumbing which is exposed to the cold.
- * Disconnect garden hoses from outside faucets.
- * Avoid parking or driving over your incoming water line.
- * It's best to pile snow over your service line and sewer lateral to provide more insulation from the cold.
- * Keep an eye out for rusty water; this is a sign of a pipe freezing.
- * If your water reaches a temperature below 34 degrees, your line may be subject to freezing.
- * Have your sewer lateral cleaned to insure no obstructions are present that may slow the flow.
- * Use more water to flush solids to the main, today's low flow toilets do not provide enough flow.
- * Do not flush sanitary wipes into the sanitary sewer, they will slow the flow and create a plug downstream.
- * Grease will solidify very quickly in a cold sewer line, which may eventually create a plug.
- * Clear your sewer vent on your house, a plugged vent will not allow your sewer to breath and will restrict the flow.
- * Most importantly, please check on a neighbor that may need a helping hand.

Call the Water or Wastewater Departments:
7:00 AM - 11:00 PM (786-3291 or 786-1301),
if you have any water related problems.

As a result, the City benefits from the vast knowledge, experience and expertise of its citizens.

Board and Commission Member positions are all voluntary and are appointed by the Mayor, with the consensus of City Council. Once appointed, the time commitment for each board/commission varies, some meet on a regular schedule, others on an as needed basis. Preparation for some meetings may require additional time obligations. Once committed, your attendance at all regularly scheduled meetings is critical.
